

Software Engineering Intern

Bengaluru, Karnataka, India

What is Visa?

WE ARE NOT A BANK; WE ARE NOT A CREDIT CARD COMPANY!!

Visa is the world's leader in digital payments technology!

Visa's mission is to connect the world through the most creative, reliable and secure payment network - enabling individuals, businesses, and economies to thrive. Our advanced global processing network, VisaNet, provides secure and reliable payments around the world, and is capable of handling over 259 billion payments transactions safely between consumers, merchants, financial institutions, and government entities in more than 200 countries and territories each year. The company's dedication to innovation drives the rapid growth of connected commerce on any device and fuels the dream of a cashless future for everyone, everywhere. As the world moves from analog to digital, Visa is applying our brand, products, people, network and scale to reshape the future of commerce.

At Visa, your individuality fits right in. Working here gives you an opportunity to impact the world, invest in your career growth, and be part of an inclusive and diverse workplace. We are a global team of disruptors, trailblazers, innovators and risk-takers who help drive economic growth in even the most remote parts of the world, creatively moving the industry forward, and doing meaningful work that brings financial literacy and digital commerce to millions of unbanked and underserved consumers.

You're an Individual. **We're** the team for you. **Together**, let's transform the way the world pays.

Behind the Visa brand are our talented employees who continuously raise the bar with innovative solutions and products that deliver the convenience and security of digital currency to more people all over the world. We are currently looking for candidates for our 2026 Summer Internship Program. Visa interns gain real-world experience working for one of the world's most recognized brands.

During this intensive 10–12-week internship, you will work on challenging and rewarding assignments, gain exposure to Visa business leaders and executives, and participate in social and networking opportunities.

This is a hybrid position. Expectation of days in office will be confirmed by your Hiring Manager.

So, what are we looking for in a Software Engineering Intern?

- HTML, CSS, JavaScript, Responsive Design, Accessibility, Objective C, and/or Android SDK
- Training in C/C++ and Object-Oriented design is preferred
- Familiarity with software development methodology that is used to structure, plan, and control the process of software development
- Experience with user research and user centered design.
- Experience with usability (e.g., as a tester, analyst, or developer using user-centered data)
- Experience with accessibility (Section 508 and/or WCAG 2.0) a plus
- Knowledge of user interface design as applied to Web-based applications and mobile devices.
- Knowledge of both Macs and PCs helpful
- Proficiency in MS Excel, Word and PowerPoint is required

The skills below will help us differentiate you with your peer group:

- Strong ability to collaborate
- Highly motivated, resourceful and ability to work independently with initial guidance and direction
- Teamwork, interpersonal & relationship-building skills, and ability to lead by influence and example
- Project management skills and attention to detail
- Strong written and oral communication, including large-group presentations
- Proven ability to prioritize and manage multiple projects simultaneously
